Brief Self-Introduction

I am a first-year PhD student in a combined master-PhD program in Software Engineering at the University of Electronic Science and Technology of China (UESTC), under the supervision of Prof Fan Zhou.

My research mainly focuses on **Robust & Personalized Multimodal Intelligence** for **non-ideal** and **dynamic** real-world environments. I am enthusiastic about designing multimodal systems that remain robust under (1) **non-ideal, imperfect inputs and environments** (e.g., missing modalities, distribution shifts) and adaptive to (2) **user-specific dynamics** (e.g., MLLM personalization). I am also interested in understanding, detecting, and moderating **user-generated multimodal content and videos** on online platforms, with a focus on improving the **generalization, robustness, and interpretability** of detection models in dynamic real-world scenarios, while leveraging MLLMs and intelligent agents.

Recently, I have been particularly interested in analyzing the capabilities of **personalized MLLM assistants in long-horizon interactions** and enhancing these capabilities through **post-training**.

Education

- **University of Electronic Science and Technology of China** — *Sep. 2023 - Present*
  Ph.D. Student in Software Engineering (Combined Master's–Ph.D. Program) — Chengdu, China
  ◦ GPA: 3.96/4.00
- **Fuzhou University** — *09/2019 - 07/2023*
  Bachelor's Degree in Automation — Fuzhou, China
  ◦ GPA: 3.71/4.00

Selected Publications

Projects & Resources

- **Personalized Research Paper Claw: Personalized Paper Discovery and Management** *2026 – Present*
  Human-in-the-loop workflow for personalized paper recommendation and research knowledge organization research-paper-claw
  - Built a **personalized** pipeline over updated top-conference acceptance lists, using fine-grained research preferences to generate ranked daily paper digests.
  - Developed **human-in-the-loop** workflows that turn selected papers into detailed notes and evolving domain **Research Galleries** with shareable HTML export.

- **Awesome Modality Missing Learning: First Comprehensive Resource Hub** *2026 – Present*
  First comprehensive GitHub resource hub for modality missing learning awesome-modality-missing-learning
  - Created **the first** comprehensive GitHub resource hub dedicated to modality missing learning, covering papers, benchmarks, datasets, surveys, and related topics.
  - Built one of the most complete and actively maintained taxonomies for missing-modality robustness, incomplete multimodal learning, and modality reconstruction research.

Honors and Awards

- **Young Science and Technology Scientists Sponsorship Program by CAST - Doctoral Student Special Plan** *10/2026*
  China Association for Science and Technology (CAST) [🌐]
- **KDD 2026 Student Travel Award** *06/2026*
  ACM SIGKDD [🌐]
- **Outstanding Communist Party Member** *06/2026*
  University of Electronic Science and Technology of China [🌐]
- **China National Scholarship ×2 (2024, 2025, combined master's–PhD)** *2024–2025*
  Ministry of Education of the People's Republic of China [🌐]
- **First-Class Academic Scholarship ×2 (2024, 2025, combined master's–PhD program)** *2024–2025*
  University of Electronic Science and Technology of China (Ranked 1st) [🌐]
- **Academic Budding Talent** *05/2025*
  University of Electronic Science and Technology of China [🌐]
- **Artificial Intelligence Algorithm Challenge Runner-up (2nd)** *11/2023*
  People's Daily Online [🌐]

Internship

- **Ruijie Networks. [🌐]** *Mar. 2022 - July. 2022*
  Software Engineer Intern Fuzhou, China
  - Maintained the WiFi Magic Box Android application, focusing on seamless user experience and enhanced wireless network management functionality.

Academic Service

- **Conference Reviewing**
  ICLR Reviewer (2027), NeurIPS Reviewer (2026), ICML Reviewer (2026), KDD Reviewer (2026, 2027), WWW Reviewer (2027), AAAI Reviewer (2026, 2027)

- **Journal Reviewing**
  TPAMI Reviewer, IJCV Reviewer, KBS Reviewer, ESWA Reviewer
