Chengdu, Sichuan - 610054, China

BRIEF SELF-INTRODUCTION

I am a first-year PhD student in a combined master-PhD program in Software Engineering at the University of Electronic Science and Technology of China (UESTC), under the supervision of Prof Fan Zhou.

My research mainly focuses on **Robust & Personalized Multimodal Intelligence** for **non-ideal** and **dynamic** real-world environments. I am enthusiastic about designing multimodal systems that remain robust under (1) **non-ideal, imperfect inputs and environments** (e.g., missing modalities, distribution shifts) and adaptive to (2) **user-specific dynamics** (e.g., MLLM personalization). I am also interested in understanding, detecting, and moderating **user-generated multimodal content and videos** on online platforms, with a focus on improving the **generalization, robustness, and interpretability** of detection models in dynamic real-world scenarios, while leveraging MLLMs and intelligent agents.

Recently, I have been particularly interested in analyzing the capabilities of **personalized MLLM assistants in long-horizon interactions** and enhancing these capabilities through **post-training**.

EDUCATION

- **University of Electronic Science and Technology of China** Sep. 2023 - Present
Ph.D. Student in Software Engineering (Combined Master's-Ph.D. Program) Chengdu, China
 - GPA: 3.96/4.00
- **Fuzhou University** 09/2019 - 07/2023
Bachelor's Degree in Automation Fuzhou, China
 - GPA: 3.71/4.00

PROJECTS & RESOURCES

- **Personalized Research Paper Claw: Personalized Paper Discovery and Management** 2026 – Present
Human-in-the-loop workflow for personalized paper recommendation and research knowledge organization [🔗 research-paper-claw](#)
 - Built a **personalized** pipeline over updated top-conference acceptance lists, using fine-grained research preferences to generate ranked daily paper digests.
 - Developed **human-in-the-loop** workflows that turn selected papers into detailed notes and evolving domain **Research Galleries** with shareable HTML export.
- **Awesome Modality Missing Learning: First Comprehensive Resource Hub** 2026 – Present
First comprehensive GitHub resource hub for modality missing learning [🔗 awesome-modality-missing-learning](#)
 - Created **the first** comprehensive GitHub resource hub dedicated to modality missing learning, covering papers, benchmarks, datasets, surveys, and related topics.
 - Built one of the most complete and actively maintained taxonomies for missing-modality robustness, incomplete multimodal learning, and modality reconstruction research.

HONORS AND AWARDS

- **KDD 2026 Student Travel Award** 06/2026
ACM SIGKDD
- **Outstanding Communist Party Member** 06/2026
University of Electronic Science and Technology of China [\[🌐\]](#)
- **China National Scholarship** 10/2025
Ministry of Education of the People's Republic of China [\[🌐\]](#)
- **Master's Student Academic Scholarship 1st division** 10/2025
University of Electronic Science and Technology of China (Ranked 1st) [\[🌐\]](#)
- **Academic Budding Talent** 05/2025
University of Electronic Science and Technology of China [\[🌐\]](#)
- **China National Scholarship** 11/2024
Ministry of Education of the People's Republic of China [\[🌐\]](#)
- **Master's Student Academic Scholarship 1st division** 10/2024
University of Electronic Science and Technology of China (Ranked 1st) [\[🌐\]](#)
- **Artificial Intelligence Algorithm Challenge Runner-up (2nd)** 11/2023
People's Daily Online [\[🌐\]](#)

EXPERIENCE

- **Ruijie Networks.** [\[🌐\]](#) Mar. 2022 - July. 2022
Software Engineer Intern Fuzhou, China
 - Maintained the WiFi Magic Box Android application, focusing on seamless user experience and enhanced wireless network management functionality.

ACADEMIC SERVICE

- **Conference Reviewing**
ICLR Reviewer (2027), NeurIPS Reviewer (2026), ICML Reviewer (2026), KDD Reviewer (2026, 2027), WWW Reviewer (2027), AAAI Reviewer (2026, 2027)
- **Journal Reviewing**
TPAMI Reviewer, IJCV Reviewer, KBS Reviewer, ESWA Reviewer
